## Topics:- of Unit-2: Understanding Harmony in the Human Being

1. Human Being as a Co-Existance of 'I' and Body.
2. Needs of Self and Body - Sukh & Suvidha.
3. Understanding the Body as an Instrument of 'I'.
4. Characteristics & Activities of 'I' & Harmony in 'I'.
5. Harmony of 'I' with the Body: Sanyam & Swasthya.
6. Prosperity & Correct appraisal of physical needs.
7. Programs to Ensure Sanyam and Swasthya.
8. Sources of Imagination in the Self.

# 1. Human Being as a Co-Existence of 'I' (Self) & 'Body'.

## What is a Human Being?

A human being is not just a physical entity but a combination of two interconnected units:

→ 'I' (Self) - The conscious, non-material entity responsible for thoughts, emotions & decision-making.

→ Body - The material entity that performs physical actions based on Instructions from 'I'.

e.g → when you feel thirsty, your Body experiences dehydration but your Self ('I') decides whether to drink water or a soft drink.

Q. Distinguish b/w the Consciousness Unit ('I') & the Material Unit (Body).

| Consciousness Unit ('I'/Self) | Material Unit (Body). |
| --- | --- |
| → Non-material | → Physical |
| → Thinks, decides, experiences emotions | → Performs physical actions |
| → Controls the body | → Acts based on the Self's decision. |

the Self is the Central entity & the Body is an instrument that follows the Self's instructions.

## 2. Needs of Self ('I') and Body - Sukh & Suvidha

A human being is a co-existence of Self ('I') & Body. To live harmoniously, we must understand their diff. needs & ensure a balance b/w them.

Different Needs of Human Beings

| Aspect | Self ('I') - Conscious Entity | Body - Material Entity |
|---|---|---|
| Need | Sukh (Happiness, Peace, Satisfaction) | Suvidha (Comfort, physical Needs) |
| Nature | Non-material, inner fulfillment | Material, physical well-being. |
| Fulfillment | Through right understanding & relationships | Through food, clothing, shelter, medicine |

Example 1: A person may have all luxuries - an expensive car, a big house, costly clothes [Suvidha], but if they lack love, respect or inner peace, they still feel unhappy. This shows that Sukh is more fundamental than Suvidha.

# Relationship Between Sukh and Suvidha

① Sukh is a continuous need, whereas Suvidha is required only at intervals.

→ Happiness, peace & satisfaction (Sukh) are something we always seek.

→ Food, shelter & clothes (Suvidha) are needed occasionally.

② Sukh is qualitative, while Suvidha is quantitative.

→ No matter how much physical comfort one has, it does not automatically bring lasting happiness.

③ Mistaken Priorities lead to Problems

→ people often overemphasize Suvidha and ignore Sukh.

For a meaningful and fulfilling life, we must balance the needs of both Self ('I') and Body.

for a meaningful and fulfilling life, we must balance the needs of both Self ('I') and Body.

Q. Mention the thru purposes for which physical facility is required for a human being.

purpose

Survival - Basic needs - [food, shelter, water etc].

Protection - Clothes, houses, medicines.

Right Utilization - Using resources wisely for happiness.

Q. Explain how Self is the 'Seer', 'Doer' and 'Enjoyer' with an example

## 3. Understanding the Body as an Instrument of 'I'

The body is an instrument used by the Self to interact with the physical world.

### Self ('I') as the Seer, Doer and Enjoyer

1. **Seer (Observer & Knower)** (Also known as Drasta) - The Self observes and analyzes situations.

- e.g → You see a sunset and appreciate its ~~bea~~ beauty in your mind.

2. **Doer (Decision Maker & Controller)** (also known as Karta) - The Self makes directions, & the body executes them.

- e.g → You decide to stand up and walk, & your body follows.

3. Enjoyer (Experiencer of Feelings) - The self experiences emotions & feelings.

- e.g → You feel happiness after achieving goal.

(also known as Bhokta)

Example: Playing Cricket

- Seer → You observe the bowler's action and ball's direction.

Doer → You decide which shot to play.

- Enjoyer → You feel excited and happy after hitting a six.

## 4. Characteristics and Activities of 'I' and Harmony in 'I'.

The Self ('I') has distinct characteristics that differentiate it from the Body. It plays a crucial role in decision-making and achieving harmony within oneself.

### Characteristics of 'I' (Self).

1. **Knowing** - The Self understands and gain Knowledge.

   e.g → learning a new skill like programming.

2. **Desiring** - The Self aspires for things based on thoughts & values.

   e.g → Wanting a peaceful life.

3. **Thinking** - The Self analyzes, plans and makes decisions

   e.g → Deciding to prepare for an exam instead of wasting time.

## * Harmony in 'I'

Harmony in the Self means having clarity in thoughts, right desires & correct decision-making.

When the Self is in harmony:

→ It makes balanced decisions.

gns with universal human values like trust, respect
sty.

oids conflicts caused by pre-conditioned desires.

iminate the response of the 'Self' from the response
e 'Body'.

| Self ('I') | Body. |
|---|---|
| Conscious decision-making | Automatic physical response. |
| Choosing healthy food | Feeling hunger. |
| Controls thoughts, feelings & actions | Acts based on biological needs. |
| Leads to satisfaction & Long-term well-being | Needs proper care for health. |

Example :-

- Your Body may Crave junk food due to hunger.
- Your Self ('I') can decide to eat healthy food instead.

## 5. Harmony of 'I' with the Body : Sanyam and Swasthya.

To maintain a balanced and fulfilling life, there must be harmony between the Self ('I') and the Body.

This harmony is achieved through Sanyam (Self-Regulation) and Swasthya (Health).

- **Sanyam (Self-Regulation)**

It refers to Self-discipline in managing thoughts, desires & actions.

→ It ensures that the Self ('I') makes the right decisions for the well-being of the Body.

e.g → Controlling the urge to overeat and choosing a balanced diet instead.

→ It depends on proper food, exercise, rest & a disciplined lifestyle.

e.g → Maintaining a regular sleep schedule to keep the Body healthy.

- **Correlation Between Sanyam and Swasthya**

- A disciplined Self ('I') ensures a healthy Body by making wise choices regarding food, sleep, and exercise.

- Without Sanyam, people engage in unhealthy habits like junk food consumption, irregular sleep and stress, leading to poor Swasthya.

- Ex → A person with Sanyam avoids smoking and stays fit, while a person without self-discipline may develop health issues due to bad habits.

Q. Describe the correlation between Sanyam and Swasthya. Suggest any two programs to improve health.

→ Two Programs for Health Improvement

1. Healthy Eating Plan

↳ Following a balanced diet, avoiding junk food and drinking enough water.

2. Daily Exercise Routine

↳ Engaging in yoga, jogging & meditation to maintain both physical and Mental Health.

prosperity already covered in Unit-1

- **Correct Appraisal of physical Needs**

physical needs refer to the necessities required for the survival and well-being of the body.

However, it is important to appraise them correctly, meaning we should:

→ Identify the real physical needs (food, clothing, shelter, Healthcare).

→ Avoid over indulgence (excessive luxury, unhealthy habits).

→ Ensure sustainability (using resources wisely for long-term well being).

- Correct Appraisal vs Misguided Appraisal of physical Needs

| Aspect | Correct Appraisal | Misguided Appraisal |
|---|---|---|
| Food | Eating a balanced diet for health | Overeating |
| Clothing | necessary cloth | Running after luxury brands |
| Shelter | Having Comfortable home | Excessive real estate |
| Technology | Using gadgets wisely | Addiction to devices. |

## 7. Programs to Ensure Sanyam and Swasthya

- Steps to Achieve Sanyam and Swasthya.

1. Good Thoughts - Developing a positive mindset and mental clarity.

2. Healthy Habits - Following a balanced lifestyle with proper diet, exercise and sleep.

3. Self-Discipline - Regulating desires to focus on needs rather than unnecessary wants.

| Objective | Benefits. |
| --- | --- |
| Improve mental clarity & reduce stress | Helps maintain emotional balance |
| Ensure proper nutrition | Improves immunity and body strength. |
| Keep the body active & fit. | Enhances stamina & prevents diseases. |
| Maintain body naturally | Improves focus. |
| Reduce Screen time & Social media distractions | Enhances productivity & mental peace. |

Q. Analyze the statement 'I am responsible for care of my body' in the light of Self-regulation.

→ Analysis :

→ The Self ('I') is responsible for making decisions about food, exercise and sleep.

→ If self-discipline is lacking, the body may suffer from laziness, obesity & diseases.

→ A well-regulated routine ensures both physical and mental well-being.

e.g → A student who sleeps late, eats junk food, and skips exercise will face health issues. On the other hand, a student who wakes up early, follows a disciplined lifestyle and eats healthy will remain active and perform well.

for our body's well-being, leading to harmony and prosperity in life.

Q. List the three sources of imagination in the self. Explain with examples.

Our imagination (thoughts, desires, expectations) in the self ('I') originates from three primary sources:

1. **Pre conditioning**: Thoughts influenced by society, family, education or past experiences.

2. **Sensations**: Feelings and desires generated through interactions with the body and external environment.

3. **Natural Acceptance** - Our inherent understanding of what is universally right, leading to long-term happiness.

Ex →

Preconditioning → Society teaches that "success = High Salary" but true success also includes happiness, relationships & well being.

Sensations → Craving fast food due to taste but realizing later that it's unhealthy.

Natural Acceptance → Understanding that helping others and being honest brings inner satisfaction.

Self (I)

- Preconditioning
- Sensations
- Natural Acceptance

E.g → A student might feel pressured by society (Preconditioning) to choose a high-paying job instead of their passion.

However, through Self-Exploration, they may relize that happiness comes from doing what they truly enjoy

→ By practicing Self-exploration, we can diffrentiate timparary desires from true well-being, making decisions that lead to harmony and happiness in life.
