Unit - 5 → Implications of the above Holistic Understanding of Harmony on professional Ethics.

Topics :-

1. Natural Acceptance of Human Values
2. Definitiveness of Ethical Human Conduct.
3. Basis for Humanistic Education, Constitution & Universal Order
4. Need for Ethical Competence in a Profession.
5. Strategy for Transition to a Universal Human Order.
6. Case Studies of Holistic Technologies & Mng. Model.
7. Scope & Characteristics of People-Friendly & Eco-friendly prod. Systems
8. Issues in professional Ethics with Solutions.
9. Maslow's Hierarchy of Needs.

by Gulshan Tomar

Natural Acceptance of Human Values

Natural acceptance means that deep inside, every human knows what is right and wrong. It is not taught from outside but comes naturally. when we follow our natural acceptance, we feel happy & peaceful.

- It helps in making ethical decisions without confusion.

- Aligns our thoughts, behaviour and actions with human values
- Creates trust and harmony in relationships.

Q. List any two criteria for the humanistic management model.

1. People - Friendly Approach : Ensures the well-being of employees, customers & Society.
   e.g → A company providing fair salaries & good working conditions.

by Gulshan Tomar

2. Eco-Friendly Approach: Uses Sustainable and environment-friendly methods.

e.g → A factory using Solar energy instead of polluting fuels.

by Gulshan Tomar

Definitiveness of Ethical Human Conduct

→ Ethical human conduct means following universal values like honesty, respect and fairness in all situations. It is definite, meaning it does not change based on personal benefits or external pressure.

- **Clarity & Consistency**: Ethical behavior remains the same in personal and professional life.

- **Builds Trust & Harmony**: When people act ethically, society becomes peaceful and fair.

- **Mutual Respect**: Ethical conduct ensures fairness and justice for everyone.

by Gulshan Tomar

Q. Access how utility value and Artistic value are related.

1. Utility Value : The usefulness of an object in fulfilling basic needs.

e.g → A chair is useful for sitting.

2. Artistic Value → The beauty or aesthetic appeal of an object.

e.g → A chair with a stylish design makes a room look elegant.

Relationship → Both values are interconnected. A well-designed product can be both functional (utility) and beautiful (artistic).

by Gulshan Tomar

* Basis for Humanistic Education, Constitution & Universal Order

→ For a better society, education, governance and global harmony must be based on human values like honesty, justice and responsibility.

- **Humanistic Education**: Education should not only focus on technical knowledge but also teach ethics, empathy and responsibility.

- **Human-Centered Constitution**: A constitution should protect human dignity, fairness and equal rights for all.

- **Universal Human Order**: A society where people and nature exist in harmony, ensuring fairness, sustainability and peace.

by Gulshan Tomar

Q. Explain the meaning of profession and explore the need for ethical Competence in a profession.

→ What is a Profession?

A profession is a specialized field of work that requires Knowledge, skills & responsibility to serve society.

E.g → Doctors, Engineers, teachers and lawyers are professionals who provide

by Gulshan Tomar

Need for Ethical Competence in a Profession:

Ethical competence means the ability to make decisions & act in ways that align with moral principles and values.

① Build Trust ② Ensures fairness ③ Long-term success

e.g-1 → An engineer working on a bridge must use high-quality materials for safety.

e.g-2 → A doctor must treat all patients equally, even if some can't afford expensive treatment.

e.g.3 → A journalist must report the truth instead of spreading fake news for money.

Professional ethics means using skills and knowledge responsibly to benefits society rather than for personal gain

by Gulshan Tomar

A truly ethical professional should:

1. Work for social good.
2. Use eco-friendly methods.
3. Make fair decisions.

by Gulshan Tomar

Q. Visualize a framework for humanistic education for children. Suggest a few ways to modify present-day school education.

Framework for Humanistic Education:

A humanistic education system should develop:

→ Moral Values - Honesty, empathy and responsibility.

→ Experiential Learning - Learning through real life experiences, not just books.

→ Social Responsibility - Encouraging students to help society.

by Gulshan Tomar

Modifications Needed in School Education:

→ Reduce rote learning – focus on understanding rather than memorization.

→ Use-Case studies – learning through real world examples.

→ Encourage Problem Solving – Instead of just giving answers, let students analyze and find solutions.

e.g.→
→ Instead of just teaching about pollution, students should visit industries, observe problems, and suggest solutions.

by Gulshan Tomar

Strategy for Transition to a Universal Human Order

To create a harmonious and ethical society, both individuals and organizations must take responsibility.

1. At the Individual Level:

→ Professionals act socially & ecologically responsible.
→ Ethical decision-making.

2. At the Society Level:

→ Businesses and organizations should follow fairness, transparency & sustainability.
→ They should focus on people-friendly & eco-friendly practices

by Gulshan Tomar

Q. Express the essence of ethical human conduct. Explain it in terms of values, policies and character.

Ethical Human Conduct = Values + Policies + Character

1. Values (Inner Beliefs) : The personal principles we follow.

2. Policies (External Rules) : Guidelines that ensure ethical behavior.

3. Character (Consistent Ethical Behavior) : Acting ethically even when no one is watching.

by Gulshan Tomar

Q. List down the four Components to ensure Humanistic Tradition.

① Right Understanding.

② Relationship

③ Physical facility.

④ Participation in Universal Order.

* Case Studies of Holistic Technologies & Management Models

Holistic technologies and management models focus on ethical, sustainable and people-friendly approaches.

→ They ensure long-term benefits for both society and nature.

→ They promote fairness, eco-friendliness and self-sufficiency

by Gulshan Tomar

Q. Take any two such e.g developed in Indian history & evaluate if they are holistic

① Traditional Indian Agriculture :

→ Uses organic methods (no chemicals).
→ Ensures soil fertility & bio diversity.
→ Supports farmers' livelihoods.

Example : In ancient India, farmers used crop rotation and natural fertilizers instead of chemical pesticides.

by Gulshan Tomar

② Handloom Industry :

→ Supports local artisans.
→ Uses natural fibers (cotton, silk, jute) instead of synthetic materials.
→ No pollution or harmful chemicals involved.

e.g : The Banarasi Saree industry provides employement to thousands while preserving traditional art.

Both traditional agriculture and Handloom industry are holistic as they balance human needs and environmental sustainability.

by Gulshan Tomar

Q. Scope and Characteristics of People - Friendly and Eco-Friendly Production Systems.

Scope of People-Friendly Production Systems.

1. Fair Wages → paid fairly for labor.

2. Safe Working Conditions.

3. Empowerment : providing opportunities for skill development & growth.

4. Inclusivity : equal opportunities for all, (gender, caste or religion).

by Gulshan Tomar

Characteristics of People-Friendly Systems.

1. Worker-Centric.
2. Ethical Practices.
3. Community Development. [growth of local communities].
4. Transparency → [Open & honest]

Scope of Eco-Friendly Production Systems

minimize environmental harm and promote Sustainability.

→ Use of Renewable Resources.
→ Low Carbon Foot print.
→ Bio diversity Conservation : [protecting natural ecosystems and wildlife].
→ minimizing waste → [Reducing, Reuse and recycle material].

by Gulshan Tomar

[Tata Solar Power].

Characteristics of Eco-Friendly Systems

1. Sustainable Resource Use
2. Pollution Control.
3. Takes responsibility for protecting the environment.

Q. Issues in professional ethics in the current scenario. List any five unethical practices in the profession today with solution to curb it. Comment on the long-term effectiveness of these methods.

by Gulshan Tomar

1. Bribery & Corruption

↳ Giving money or favors to gain unfair advantages.

e.g → A Company pays a bribe to get a government Contract.

Sol → Anti-Corruption laws, transparency policies.

2. Exploitation of Workers

↳ paying low wages or making employees work in poor conditions.

e.g → Some factories force workers to work long hours for little pay.

Sol → Strong labor laws, fair wage policies.

by Gulshan Tomar

3. Environmental Pollution

↳ Ignoring pollution control to cut costs.

e.g → factories dumping waste into rivers to save money.

Sol → Stricter regulations, promoting green energy.

by Gulshan Tomar

4. False Advertising & Misinformation.

↳ misleading customers with fake claims.

e.g → A food brand falsely claiming "100% natural ingredients".

Sol → Fact-checking laws, consumer protection policies.

5. Lack of Social Responsibility

↳ Companies focusing only on profit, ignoring their impact on society.

e.g → A company refuses to reduce its plastic waste, harming the environment.

Sol → ethical Leadership.

by Gulshan Tomar

* Maslow's Hirarchy of Needs

→ Maslow's Hirarchy of Needs is a psychological theory that explains human motivation and behavior based on a five-tier model of needs.

→ These needs are arranged in a hirarchy, meaning that lower-level needs must be satisfied before higher-level needs can be addressed.

by Gulshan Tomar

Level 1 : Physiological Needs

↳ Basic survival needs required for human existence
[food, water, air, shelter, cloth].

→ These needs must be met first before any other needs can be addressed.

Level 2 : Safety Needs

↳ The need for security, stability and protection from harm.
[Physical safety, financial security, health].

by Gulshan Tomar

Level 3: Social Needs [Love and Belonging].

↳ The need for relationships, love and a sense of belonging.

[family, friendship].

→ Humans are social beings and need connections with others.

Level 4: Esteem Needs

↳ The need for respect, recognition and self-esteem.

[Achievement, status, respect from others, self confidence]

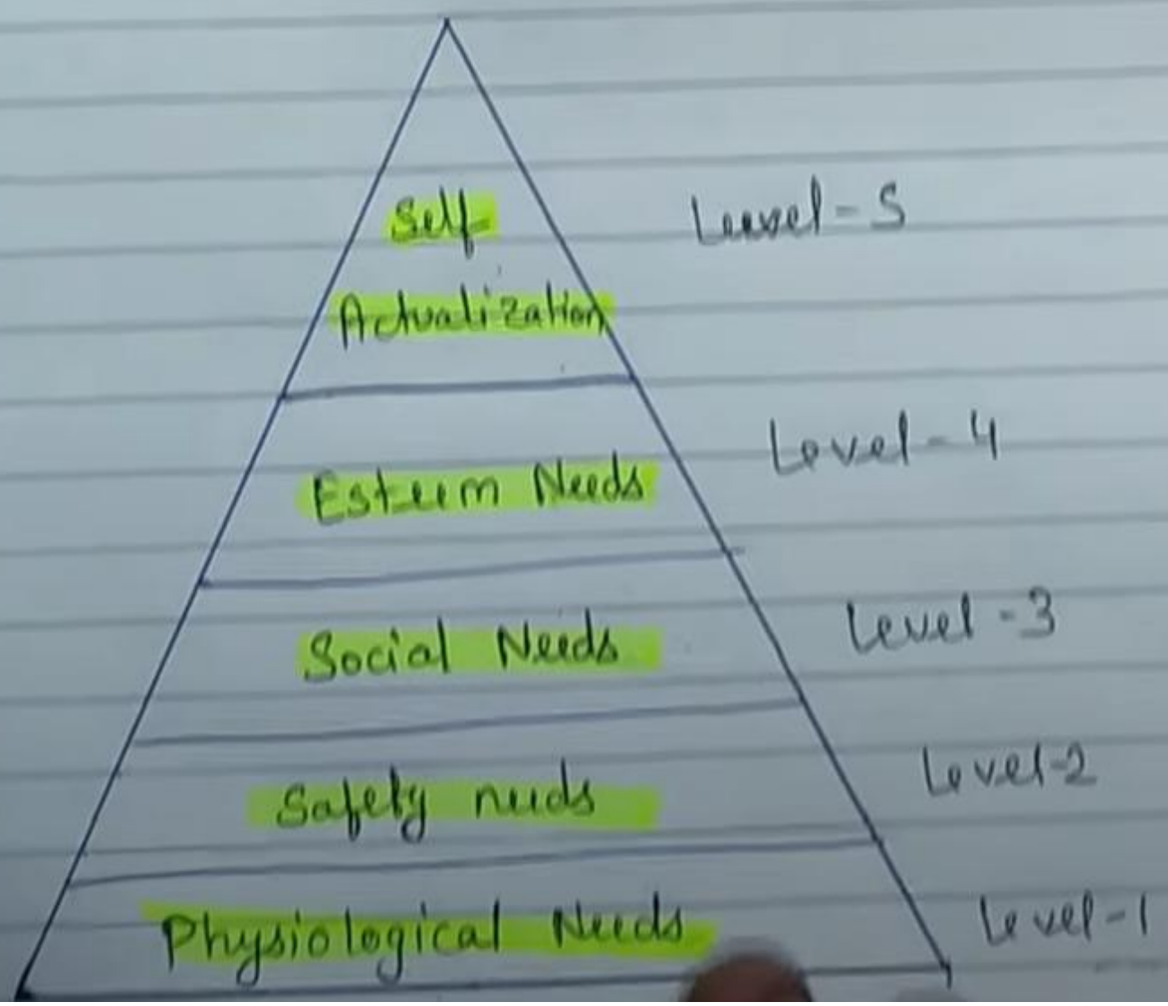
by Gulshan Tomar

Level-5 : Self - Actualization

↳ The need to realize one's full potential and achieve growth.

[Pursuring creative activities, personal goals, self improvement].

This is the highest level of human motivation. ✓



by Gulshan Tomar
